Foreword

Dear Colleagues and Friends,

IBRA is celebrating its 10th birthday and is pleased to invite you to this seminar and workshop concentrating on „Trauma and Reconstruction of the Upper Limb“.

The date - right before the opening of the 10th Congress of Asian Pacific Federation of Societies for Surgery of the Hand - is special. In an extraordinary way, this allows this course to be an international forum reaching across geographic and cultural borders and to provide a network for the exchange of experience and knowledge.

The location - right in the heart of Kuala Lumpur, Malaysia‘s capital city with towering skyscrapers and bustling shopping malls - is also meaningful. It reflects the growing importance of the Asia-Pacific region with its rapid development in various aspects including the medical field.

Combining these two, we are looking forward to a close exchange between participants and faculty, an interesting hands-on cadaver lab and the sharing of many fruitful discussions.

Sharifah Roohi Ahmad
President MSSH
Organizing Chairperson APFSSH 2014

About IBRA

IBRA is a financially independent, internationally oriented non-profit organization, for specialized clinicians and research scientists. IBRA's core activity is the future-oriented advancement of bone-tissue research and management focusing particularly on:

- Bone biology, including osteointegration, bone generation and soft tissue reaction
- Maxillofacial and orthopaedic rehabilitation
- Materials research including hardware development
- Biomechanics
- Tissue engineering
- Surgical procedures & clinical management

IBRA encourages the development of innovative solutions in a friendly, loyal atmosphere. Future-oriented open-mindedness and international acceptance form the basis for first-rate assistance in realizing modern research projects and promoting individual careers. As an international forum reaching across geographic and cultural borders, IBRA offers an up-todate network for the exchange of experience and knowledge in applied bone and tissue research.

History
IBRA was founded in Zurich, Switzerland on September 25, 2004 at the initiative of eighteen forward-looking clinicians. Its primary aims are the exchange of professional knowledge, promotion of new scientific developments, engineering of the musculoskeletal system, coordinated multi-centre research and highly specialized advanced training.

Research Support
IBRA offers financial support for research projects dealing with bone biology and the improvement or development of internal fixation devices for maxillofacial and limbs surgery. With the emphasis on innovation and suitability for practical application, 95% of the research budget goes towards applied research and clinical studies and 5% towards basic research.

Education
IBRA's education area offers clinicians special courses on the application of specific methods of treatment. IBRA's particular concern is to train tomorrow's highly qualified research scientists. IBRA enhances its members' qualifications through a scholarship program.

Program Description

An interactive, hands-on Seminar and Workshop, addressing trauma and reconstruction of the hand, wrist and part of the elbow with representative cases and discussions. International faculty will apply evidence and present latest innovations in lecture format and surgical demonstration to the participating hand and orthopaedic surgeons.

Course Format

The program focusses on hands-on cadaveric exercises. It is divided into 4 sessions concentrating on hand (phalanges, metacarpals), carpus, distal radius and elbow (radial head, olecranon).
Each session starts with a presentation introducing the indications and current treatment options. After that, a number of exercises will be carried out allowing a close interaction and discussion with the faculty.
